DETAILED ACTION

1. This action is in response to Applicant's Amendments filed on June 04, 2007 have been considered but are deemed moot in view of new ground of rejections below.
2. Claims 1, 11, 29, 32 and 46 are amended. Claims 1, 4-19, 29-34, 36, 38, 39, 43 and 45-47 are now pending.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1, 4-19, 29-34, 36, 38, 39, 43 and 45-47 are rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter.

As set forth in MPEP 2106 (II) (A):

A. Identify and Understand Any Practical Application Asserted for the Invention

The claimed invention as a whole must accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." State Street, 149 F.3d at 1373, 47 USPQ2d at 1601-02. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of "real world" value, as opposed to subject matter that

Art Unit: 2166

represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96); In re Ziegler, 992, F.2d 1197, 1200-03, 26 USPQ2d 1600,1603-06 (Fed. Cir. 1993)). Accordingly, a complete disclosure should contain some indication of the practical application for the claimed invention, i.e., why the applicant believes the claimed invention is useful.

Apart from the utility requirement of 35 U.S.C. 101, usefulness under the patent eligibility standard requires significant functionality to be present to satisfy the useful result aspect of the practical application requirement. See Arrhythmia, 958 F.2d at 1057, 22 USPQ2d at 1036. Merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make the invention eligible for patenting. For example, a claim directed to a word processing file stored on a disk may satisfy the utility requirement of 35 U.S.C. 101 since the information stored may have some "real world" value. However, the mere fact that the claim may satisfy the utility requirement of 35 U.S.C. 101 does not mean that a useful result is achieved under the practical application requirement. The claimed invention as a whole must produce a "useful, concrete and tangible" result to have a practical application.

Claims 1, 4-19, 29-34, 36, 38, 39, 43 and 45-47 are non-statutory. Because claims 1, 29 and 43, end at step of "the child process performs the checking, the conditionally copying and the alternatively creating". Merely "performing the checking, the copying and the creating" by processor, do not provide any tangible results and practical real world application. Thus, the claims 1, 4-19, 29-34, 36, 38, 39, 43 and 45-47 are not a statutory and should be rejected under 35 U.S. C. § 101 as not being

tangible.
